

LUBB — README

LUBB

The core of your business in one place.

Version 0.7.13

Windows Desktop Application

Developed by DESIGNIC

ABOUT LUBB

LUBB is a Windows desktop business management application designed for shops and small businesses. It brings point of sale, products, invoices, reports and everyday business settings together in one focused application.

- Point of Sale
- Product and service management
- Inventory and stock tracking
- Customer details
- Invoice creation, preview, printing and PDF export
- Sales and business reports
- Payment method configuration
- Product fields and custom business settings
- Store and invoice information
- Backup management
- Arabic and English interface

GETTING STARTED

No installation is required. Extract the ZIP file to a folder on your computer, run **LUBB.exe**, then configure your business information from Settings before normal use.

For best results, keep the complete LUBB folder together and do not move or delete application files individually.

INVOICES FOLDER

The included **Invoices** folder is used by LUBB for invoice-related files. Do not delete this folder while using LUBB. If you move LUBB to another computer or storage location, keep the application files and the Invoices folder together.

BACKUPS

LUBB includes backup tools for protecting important business data. Regular backups are strongly recommended, especially before moving the application to another computer or making major system changes.
